

MULTI CLOUD MANAGED SERVICES

Zones provides 24x7 support, proactive monitoring, and management for SaaS, IaaS, and on-premise environments across multiple cloud platforms like Azure, AWS, and GCP. Customers benefit from optimized performance, cost efficiency, enhanced security, and reduced multi-cloud complexity.

Business Challenges

- **Cloud Management:** Managing and coordinating across multiple cloud environments and diverse global teams.
- **Regulatory Compliance:** Ensuring compliance with complex regulations across various jurisdictions.
- **Cost Optimization:** Optimizing costs and resource allocation at scale while maintaining performance and security and support services.

Zones Offering

- Comprehensive management of Microsoft 365, Google Workspace, and cloud infrastructure across Azure, AWS, and GCP.
- AI-driven on-premise management with predictive performance and monitoring.
- 24x7 support for SaaS, IaaS, and private cloud workloads, ensuring seamless operations.
- Proactive application and infrastructure monitoring, configuration, and performance optimization.
- Cloud governance focusing on spend optimization and security compliance.

Business Benefits

- Improved Operational Efficiency.
- Enhanced Scalability and Flexibility.
- Streamlined Cloud Migration Processes.
- Optimized Resource Utilization.
- Increased ROI and Cost Savings.
- Proactive Risk Management.
- Simplified Multi-Cloud Management.
- Advanced Analytics for Informed Decision-Making.

Why Zones:

- Competitive pricing that reduces costs by 50% compared to other vendors.
- 24x7 comprehensive support for Microsoft technologies with rapid problem resolution.
- 30-minute response times for critical issues, ensuring business continuity and priority handling.
- Access to a dedicated Technical Account Manager and tailored support aligned with your goals.
- Enhanced IT value through on-demand training, self-service health assessments, and customized onsite support.

Case Studies:

- Zones partnered with BioTE Medical to **modernize their IT infrastructure**, replacing GoDaddy with Microsoft 365 to enhance scalability and compliance. Zones demonstrated M365 capabilities, delivered a detailed Statement of Work, and supported their transition to a CSP model, enabling future migrations and flexibility for their aggressive growth plans.
- **Zones streamlined a global telecom enterprise's complex data center rack deployment** by consolidating multi-vendor solutions into a unified strategy. Through expert analysis and end-to-end management, Zones reduced implementation time by half, delivered modernized infrastructure, and provided ongoing support to ensure efficient troubleshooting and operational continuity.
