

Secure IT Asset Disposition with Zones

Ensure compliant, secure, & sustainable IT asset management while optimizing the lifecycle of your IT investments.

BUSINESS CHALLENGES:

Managing retired IT assets poses challenges for organizations. Ensuring data security and compliance during disposal is essential for protecting sensitive information and maintaining brand reputation. Organizations must also navigate strict regulations on digital waste disposal while adopting environmentally responsible practices. Furthermore, overlooking the potential value recovery from end-of-life IT assets can lead to missed opportunities for cost optimization and improved ROI.

SOLUTION OVERVIEW:

Zones IT Asset Disposition (ITAD) offers a streamlined, secure IT asset management solution. We provide certified data erasure using NIST-approved software, ensuring complete data wiping from HDDs, SSDs, laptops, servers, and tablets. Our services comply with NIST 800-88 standards, generating certificates and audit-ready reports. By securely erasing data, organizations can prepare assets for resale or redeployment, maximizing value and reducing costs. Zones ITAD also promotes responsible IT disposal, supporting sustainable practices. With comprehensive support—from onsite and offsite data erasure to asset recycling—Zones ITAD ensures a secure lifecycle for all IT assets.

DEMO OVERVIEW:

Our demo provides an in-depth look at Zones data erasure software in action. It demonstrates the NIST 800-88-compliant data erasure process, including built-in diagnostics and certification capabilities. You'll also see how erased assets are prepared for resale or redeployment, helping maximize ROI while ensuring full compliance.

Ready to protect your data, meet compliance standards, and recover value from your IT assets?

Contact your Zones Account Executive today to schedule a demo and learn more about our ITAD solutions.
