Exchange Migration

Efficient Cloud Transition with Exchange Migration Services.

BUSINESS CHALLENGES:

Migrating from an on-premises Exchange environment to the cloud or transitioning between different Exchange providers can be complex for enterprises. Ensuring data integrity, seamless email functionality, and minimizing downtime are critical for maintaining collaboration and productivity.

SOLUTION OVERVIEW:

Microsoft Exchange Migration simplifies the transition to cloud-based email with features that enhance security and management, including anti-malware and anti-spam filters, 99.9% uptime, and an easy-to-use Exchange Admin Center. Zones Exchange Migration service ensures the secure transfer of critical data—emails, contacts, and calendars—while managing mobile device policies and compliance, reducing the administrative burden of system patching.

DEMO OVERVIEW:

Our lab demo showcases a user mailbox migration between Exchange Online tenants using Microsoft's Cross-Tenant Migration Wizard.

Ready to explore a seamless migration experience? Contact your Zones Account Executive for a demo.

TARGET TENANT PREPARATION

Create the migration application and secret → Create the Exchange Online Migration Endpoint → Create the Exchange Online Organization Relationship

Already Configured

To Be Shown in Demo

SOURCE TENANT PREPARATION

Accept the migration application → Configure the organization relationship → Test Migration Server Availability

TARGET USER OBJECT PREPARATION

Provision a MailUser object in the Target Organization → Assign License to the MailUser → Create Migration Batch
