ZONES™

Streamline IT Integration and Configuration with Zones IT Lifecycle Services

ZONES

Dynamic business technology landscape calls for proven IT implementation and rollout strategies

While rapid technology innovations have enabled businesses to transform for success, they have also resulted in faster obsoletion of previous technology investments. New devices must now be deployed at offices, sites, and end-user locations within days to

run core business processes without disruption. Moreover, the IT lifecycle is becoming shorter, meaning that new deployments are no longer a once-in-a-decade phenomenon.

- In the absence of defined IT integration workflows and guardrails, most enterprises introduce a technology management debt with IT deployments and rollouts.

- Makeshifts and workarounds result in a complex IT footprint, contribute to a lack of visibility into technology systems, and delay implementation post-device receipt.

- Mobile technologies further exacerbate these challenges, and in the absence of a centralized technology management function, IT costs spiral out of control.

Today's dynamic technology landscape and distributed, digital business require a methodical, and proven approach to IT implementation, rollout, and management. Bring method to madness, optimize implementation costs, minimize failure, and maximize IT asset value from day zero with Zones IT Integration and Configuration services.

Accelerate the business value of your IT with Zones IT Integration and Configuration Services

Zones IT Integration and Configuration Services help you accelerate deployment-ready devices to any site, office, or end user, on-time and on budget. Leveraging our network of ISO Certified Technology Solutions Centers, and certified engineers, we help you:

- Minimize the cost of configuring your devices and integrating them into your environment.

- Minimize the time from receipt of IT assets to their installation and deployment.

- Simplify customization requirements for large-scale technology rollouts with preboarding.

- Ensure IT asset compliance from day zero with enrolment and asset tagging.

Our IT integration and configuration services help you incorporate new IT assets into your enterprise at the lowest costs, securely, and cost-effectively.

Zones IT Integration and Configuration Services: an overview

Proof of Concept engineering solutions: Formulate and validate technology implementation feasibility before committing to full-scale deployments to mitigate risk.

Customized imaging and enrolling: Preconfigure software and hardware requirements into new devices and enroll them into your UEM and data center management solutions before delivering to deployment sites.

Customized device configurations: Bake network configurations, access privileges, and security controls into new devices before shipping them to the deployment site.

Asset tagging and data capture: Track IT asset location, OEM specifications, warranty details, and configuration data to maintain up-to-date views of your IT footprint, including newly provisioned devices.
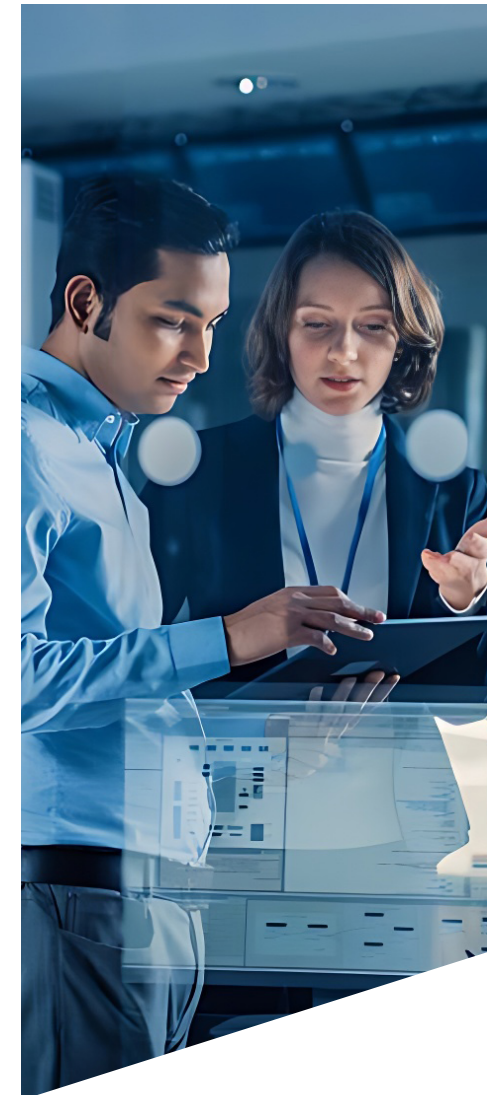

Secured auto-pilot & SCCM network connectivity: Streamline device provisioning and setup, and ensure tamper-proof device enrolment to simplify IT asset management.

Contingency and disaster recovery planning: Maintain project timelines and data integrity in face of adverse events by defining recovery strategies, protocols, and backups.

Environmentally safe IT asset disposition: Ensure responsible and sustainable disposal of obsolete and old devices while maximizing value recovery.

Why Zones for IT Integration and Configuration?

- ISO-certified Technology Solutions Centers (TSCs) deliver trusted and quality-assured integration and configuration management services.

- OEM certified technicians, supported by ongoing education and development bring expertise and experience in the latest technologies.

- Successful track record of catering to large-volume accounts and facilitating large-scale rollouts on time and on-budget with repeatable success.

- End-to-end IT Lifecycle Services from a single technology partner cater to all your IT needs from purchase to rollout, commissioning, and disposition.

- Exploit our economies of scale and access our expert technicians on demand to support ongoing IT integration and configuration needs instead of hiring costly resources.

- Experience in delivering custom integration and configuration services at scale for the entire range of enterprise IT, from data centers to end-user devices.

Ready to accelerate your technology deployments with our IT integration and configuration services? Call 800. 408.ZONES or write to ZonesServices@zones.com to start now.

About Zones

Zones is a global provider of end-to-end IT solutions with an unmatched supply chain. Positioned to be the IT partner you need, Zones, a Minority Business Enterprise (MBE) in business for over 35 years, specializes in Digital Workplace, Cloud & Data Center, Networking, Security, and Managed/Professional/Staffing services. Operating in more than 120 countries, leveraging a robust portfolio, and utilizing the highest certification levels from key partners, including Microsoft, Apple, Cisco, Lenovo, Adobe, and more, Zones has mastered the science of building digital infrastructures that change the way modern organizations do business. Whatever you need, you can *Consider IT Done.*
