# IT Asset Disposal (ITAD)

Zones Technology Solution Centers Deliver: **IT Asset Disposition.**

## PRACTICE SECURE, COMPLIANT IT DISPOSITION OR EXTEND THE VALUE OF TECH ASSETS. ZONES CAN PROVIDE THESE SERVICES GLOBALLY.

Our IT Asset Disposal (ITAD) services give you peace of mind, knowing that your old IT equipment is reused or disposed of in an environmentally safe manner that satisfies all Federal, State, and Local laws and regulations.

**Breaking down the advantages of ITAD.**

- **Green IT** – IT asset lifecycle management reduces the consumption of natural resources. By extending the usefulness of your equipment, you can make them accessible to people and organizations that cannot afford new ones.

- **Value Recovery** – Professional ITAD companies ensure you don't miss out on any opportunity to leverage your end-of-life equipment. They have well-built direct sales channels that can help you recover the maximum value from your assets.

- **IT Asset Tracking** – Judiciously tracked IT inventory ensures compliance with data and environmental regulations and transparency in value recovery.

- **ISO Certified Technology Solution Centers** – ISO 9001, ISO 14001, Provide an extra layer of quality, security, and environmentally safe handling of all IT Assets. Provide an extra layer of quality, security, environmental management, and safe handling of all IT assets' disposition. Zones ITAD services hold high expectations on environmental best practice and sustainability to lower it's carbon footprint with a zero waste goal.

**Zones' Technology Solution Centers achieved ISO certification.**

All four of our US TSCs were certified for ISO 14001:2015 for environmental management and re-certified for ISO 9001:2015 for quality management.

The certifications show our commitment to our partners, clients, and planet.

TÜV NORD / TÜV USA Inc. / ISO 9001

TÜV NORD / TÜV NORD CERT GmbH / ISO 14001

## REFURBISHMENT AND RESTOCK

- Equipment is fully functional, clean, and repackaged before stocking in our Logistics Center
- Redeployment of equipment on-demand

## DEPOT AND "SPARE IN THE AIR" PROGRAM

- Minimize down time for users
- Using a seeded spare pool, we can ship pre-configured replacements to end users, along with instructions to return the defective unit
- Our certified technicians will diagnose and repair the defective unit and return it to the depot stock for future use

## REMARKETING

- Resale of retired equipment under revenue sharing agreement
- Increases overall ROI of IT assets

## DATA DESTRUCTION

- Secure data destruction, adhering to DOD 5220.22m standards
- Non-functional hard drives are physically crushed, rendering the drives unreadable
- Certificate of destruction

## EQUIPMENT DISPOSAL

- Partnerships with R2- and e-Steward certified recycling companies
- Safe, compliant, and environmentally friendly disposal
- Complete and accurate log of equipment received and disposed
